Getting Started
Right

“X Factor™” System

RoyalFlushClub.com

X Factor™ System

- Simple Sit & Go System
 - Based on Chip Position vs. Blinds
1. **Calculate Stack-to-Pot Ratio**
 - Stack Size *divided by* Blinds + Antes
 2. **Adjust Play Style Based on this X Factor**

Calculating Your X Factor™

- **X FACTOR = STACKSIZE** divided by **INITIALPOT**
- **STACKSIZE** is your current stack size
- **INITIALPOT** is the size of the pot at start of hand, (once all blinds and antes are in the pot)
- **EXAMPLE** - Blinds 100/200 w/ antes 25, 8 players
 - That's a total pot of 500 (100 + 200 blinds + 200 antes)
 - Your stack size = 5,000 then **X Factor** is **10** (5,000 / 500)
 - If your stack size is 3,000 then **X Factor** = 6
 - If stack size is 1,000 then **X Factor** = 2

X Factor Playbook™

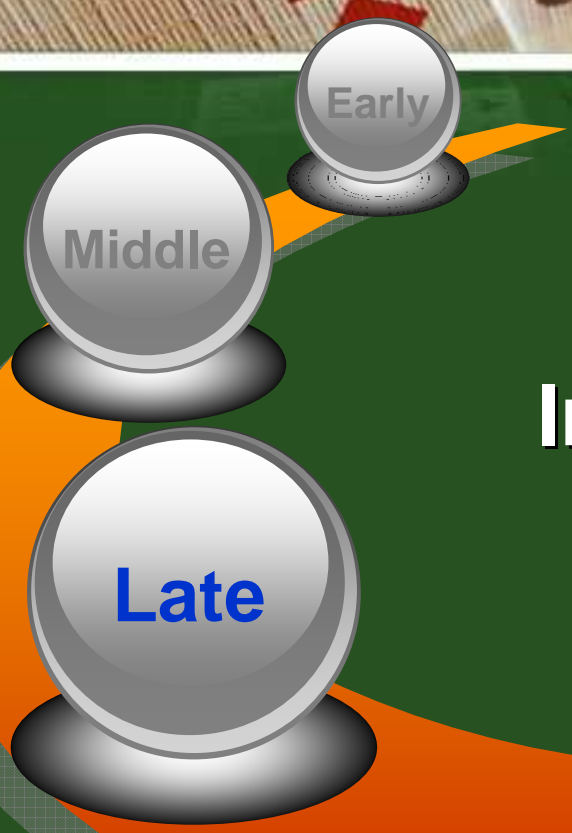

- **X Greater Than 30 (Chip Monster)**
 - Take more risks, bluff & steal more, use your stack aggressively; risk no more than 10 X
- **X Greater Than 20 (Easy Street)**
 - Take some calculated risks, bluff & steal some, use stack selectively aggressively; risk no more than 8 X
- **X Between 15 to 20 (Average Stack)**
 - OK shape, hold out for better hands, run some traps and bluffs, risk no more than 5 X at this point
- **X Between 8 to 14 (Borderline)**
 - Tighten up, take fewer risks, protect your stack, wait for good hands to engage, best positions to bluff/steal
- **X is 7 or less (Push/Fold)**
 - Push/Fold mode; All-in on any heads-up hand, otherwise fold
